Summary

Senior Software Engineer with a decade of experience in backend and full-stack development, cloud-native architectures, and scalable solutions. Passionate about mentoring engineers and delivering high-impact technical projects.

Professional Experience

T-Mobile US, Atlanta, GA

Sr. Site Reliability Engineer

Mar 2021 - Present

Aug 2024 - Present

- Led a team of engineers for a development of RESTful API for change notifications and application deployments.
- Mentored junior engineers, led intern bootcamps, and conducted technical interviews.

Software Engineer

Mar 2021 - Aug 2024

- Built admin dashboards using React integrated with GraphQL APIs.
- Managed deployments and DevOps workflows using Kubernetes, Docker, AWS, and GitLab CI/CD.

Zuora, Atlanta, GA

Sr. Technical Consultant

May 2017 - Mar 2021

May 2019 - Mar 2021

- Built reusable frameworks and open-source assets that accelerated client onboarding and solution delivery.
- Conducted technical workshops with Fortune 500 clients, educating them on Zuora's platform and Salesforce best practices.

Technical Consultant

May 2017 - May 2019

- Designed and implemented scalable billing and subscription management solutions, integrating Zuora with Salesforce and client ERP systems.
- Developed custom Salesforce applications and automated workflows to support enterprise-scale subscription lifecycles.

Daugherty Business Solutions, Atlanta, GA

Software Engineer 2

Jan 2015 - May 2017

Feb 2017 - May 2017

- Introduced versioned deployments and improved release management processes, reducing deployment errors.
- Collaborated directly with client stakeholders to gather requirements and deliver incremental releases.

Software Engineer 1

Jan 2015 - Feb 2017

- Developed a hotel management tool for Hyatt Corporation to calculate global room and group booking prices.
- Implemented backend services using Spring Boot and Oracle SQL, ensuring accuracy and scalability of pricing logic.
